COMPANY STORY

MATEC®, was founded at the end of 70's, in the City of Milan, Italy. The initial idea was to propose "FLEXIBLE SOLUTIONS". In the very beginning, Matec was counting a staff of few people and a small production site, while today, Matec is well positioned on a land of approx 15,000 sqm with warehouses, workshops, welding and production lines in Peschiera Borromeo, close to the city of Milan, besides the Linate Airport and the main Milan ring road and the main motorways.

COMPANY STORY

1980
1985

The company moved to Peschiera Borromeo in 1980. Early technical and marketing innovations began to produce successes and, in 1985, the company moved to a larger building in the same city and **started the production of Flexible composite hoses**.

1990

The Italian's first flexible composite hose, was developed in the early 1990's, with the brand of **COMPOTEC®**.

1995

A second major milestone occurred in 1995 when the company decided to acquire an historical firm, very well known in the field of flexible metallic hoses, and quick connect fittings, the company **ENCO®** located in Buccinasco, south of Milan, an innovative step towards diversification.

In the following years technical progress resulted in Composite hose production for petrochemical industries, and soon **hundreds of practical uses were discovered**.

1998

Markets further expanded in the 1998's into **chemical, pharmaceuticals, marine, energy,** and globally to almost every country in the world.

2000

In the 2000's, Matec Group continued to develop an array of innovative products, including the first Food grade Composite hose with FDA approval and a series of **Fire Proof Composite hoses**.

In 2000, Matec Group finalized the acquisition of another historical company well known and established in the field of Mandrel built Rubber hoses, the company **FARIVO®** and the sales topped with innovative new products contributing significantly to growth.

2010

In 2010, Matec Group acquired one of the oldest and best known Italian companies specialized in the production of Expansion Joints, know with the brand **TOFLEX®**.
This latest acquisition is now completing the synergy of the global offer that MATEC® Group is offering in the field of Flexibles.

2013

In the 2013's, Matec Group created **BluZac®**.
Craftsmanship and innovation. It's the perfect marriage of these two elements that breathes life into Blu Zac's products and services, such as filters, strainers & steam traps.

The proposal to the market is now complete, for every need, Matec group can offer a **"FLEXIBLE SOLUTION"**.

2018

In 2018, Matec Group defined the acquisition of **ROITER** production site in Rovigo, specialized in the large-scale production of high-quality and sophisticated industrial hoses, from the Austrian company Semperit AG Holding.
This is actually an initiative in contrast with the general context, because instead of relocating abroad to nations that guarantee a low cost of labor, we decided to invest in our territory and to support the value and the competence of the 'Made in Italy'.

FLEXIBLE SOLUTION

COMPANY LOCATIONS

Approximately 60 people work for the company in the sites of:

HEAD OFFICE	Via 1° Maggio, 7 - 20068 Peschiera Borromeo (MI) Italia
ROITER	Via A. Grandi, 45100 Rovigo Italia (RO) Italia
MATEC INDUSTRY	Via Luigi Pirandello n. 24 Camporotondo Etneo 95040 Catania (CT) Italia
MATEC FRANCE	35, Rue Paul Déroulède F 06000 Nice - France
MATEC LATAM	Ronda Sant Pere N 27. 3° 08010 Barcelona - Spain
MATEC MIDDLE EAST FZ LLC	Level 27 & 29, Marina Plaza Dubai Marina, Dubai, United Arab Emirates
MATECGROUP ASIA PACIFIC	WTC 3, 20th Floor Jl. Jend Sudirman Kav 29 - 31 Jakarta 12920, Indonesia
MATEC FARIVO	Via Conchia 70043 Monopoli (Bari) Italy

ACTIVITIES

MANUFACTURING

ASSEMBLING

TRADING

MATEC GROUP

COMPOTEC® DIVISION

Composite Flexible hoses for Chemical and Petrol-chemical applications.

Fittings, coupling and accessories for Composite hoses.

Swaging and crimping machines for Composite hose assemblies, from 3/4" to 12", Hydrostatic test bench

ENCO® DIVISION

- Flexible metal hoses with parallel corrugation, Hydraulically or mechanically formed, with Stainless Steel external braid.
- Flexible PTFE hoses, smooth bore or convoluted, with external Stainless Steel braid.
- Quick connect couplings (ISO A/ ISO B)
- Cam & groove couplings
- Quick complings for road and rail tankers (DIN, UNI, Guillemin, Storz)

TOFLEX® DIVISION

- Metal expansion joints
- Fabric, rubber, PTFE, expansion Joints
- Single or multiple ply with diameters from 15 to 7000 mm
- Axial
- Hinged
- Gimbal
- Lateral
- Pressure Balanced
- Universal

ROITER® DIVISION

- Flexible rubber hoses for industrial application, mandrel built.
- Assembled rubber Industrial & Marine hoses from 1/2" diameter till 24"
- Rubber and Polyurethane industrial coatings of idlers, cylinders, hoppers, tanks, sifters

BLU-ZAC DIVISION

- Engineering and construction of Strainers, Filters, steam traps, sight glasses, manifolds, skid units for Oil & Gas, Chemical & Petrochemical industry.

INDUSTRIAL DIVISION

- Flexible PVC & Polyurethane hoses.
- Ventilation & Suction hoses.
- TRATHERMIC® Insulation Plates.
- PTFE & Silicone impregnated fabrics.
- Technical supplies for industrial maintenance.

MAIN SKILLS

SECTORS OF APPLICATIONS

- Chemical
- Petrochemical
- Cryogenic
- Mechanical and metallurgical Companies
- Flameproof
- Natural Gas
- Power and refrigerator plants

EXCLUSIVE AGENCY

- DIXON Fittings Couplings
- MACOGA Expansion Joints
- RILCO Pipe Supports

WELDING PROCESS

According to:

- EN 15608:2005
- EN 439:1996
- EN 15614-1:2005
- EN 6848:2005
- EN 12072:2001 certified by DNV Det Norske Veritas
- ASME IX certified by RINA

PROJECTS & ENGINEERING

Our engineers and technicians offers new solutions for any type of special application. Our Technical office can provide drawings, certificates, mathematic modules, calculations and stress analysis. In our well equipped library we have a full documentation regardind all norms and standards:

- UNI
- ASME
- DIN
- ANSI
- ASTM
- B.S.
- E.N.
- PED
- ATEX

TEST & INSPECTIONS

Internal

- Pneumatic Test
- Hydrostatic Test
- Nitrogen Test
- Vacuum Test
- Penetrating dye Test
- Electrical resistance Test

Third Party external bodies

- Radiography
- PMI Test
- Resilience Test
- Tensile Test
- Hardness Test
- Macrography
- Micrography
- Pmi Test
- Corrosion Test

Manufacturing Standards:

- COMPOTEC® Hoses EN 13765/EN 13766:2010
- ENCO® Hoses ISO 10380
- EXPANSION JOINTS UNI EN 14917
- ATEX 2014/34/UE
- PED 2014/68/UE

FOOD INDUSTRY

PAPER INDUSTRY

OFFSHORE

QUALITY ASSURANCE AND CERTIFICATIONS

Matec quality management system is certified according to ISO 9001:2008.

Our quality assurance department ensures that our quality procedures are followed and improved throughout the complete manufacturing process cycle.

Welders and welding procedures are cerfified by DNV.

PED 2014/68/UE - ATEX 2014/34/UE
